

## Report

**Event/Workshop/FDP/Program/Activity Name:** JISCE AICTE IDEA Lab product making and supply and IRG

**Date:** 27/02/2023

**Convener or Coordinator Name:** Dr. Biswarup Neogi

### About the Program:

In a remarkable manufacturing endeavour, a batch of exquisite mementos was crafted for the esteemed Chief Guest and dignitaries attending the APAI Pre-Counselling Fair 2023. The mementos were designed to be a token of appreciation and recognition for their presence and valuable contributions to the event. The process involved a seamless combination of advanced technology and meticulous craftsmanship.

The mementos were created using high-quality Korean sheet material, known for its elegant appearance and durability. Advanced CNC technology was utilized to intricately engrave the Korean sheet with personalized designs and details, adding a touch of sophistication to each piece. Laser cutting technology was employed to cut out the letters and elements with utmost precision, ensuring flawless results. Once the manufacturing process was completed, the beautifully crafted mementos were promptly supplied to APAI Pre-Counselling Fair 2023. They served as a timeless reminder of the event, symbolizing gratitude and respect for the Chief Guest and dignitaries, while adding a touch of elegance to the occasion.
